

PLACEMENT STATUS OF ASSAM AGRICULTURAL UNIVERSITY

2021–22 to 2025–26

Introduction

The Training & Placement Cell of Assam Agricultural University (AAU), Jorhat plays an important role in facilitating career development, employability enhancement and placement opportunities for students across the University. The Cell serves as a link between students, prospective employers, industry and other organizations, while also providing students with opportunities to develop the skills and competencies required for successful careers.

During the reporting period 2021–22 to 2025–26, the Training & Placement Cell undertook a range of career development and employability-oriented activities, in addition to facilitating recruitment and placement. These included soft-skill and personality development programmes, communication and interview preparation, career guidance and awareness programmes, CV/resume writing workshops, study-abroad and higher-education guidance sessions, industry interaction, alumni engagement and pre-placement programmes. The activities were designed to improve students' confidence, professional communication, career awareness, resume-building and preparedness for competitive recruitment processes.

The Cell also facilitated interactions with a diverse range of organizations and sectors, including government departments, banking and financial institutions, agriculture and agribusiness companies, dairy and food-related organizations, research and extension institutions, educational institutions, NGOs/development organizations and private and corporate organizations. Documented initiatives during 2024–25 included recruitment interactions with JAM Agri, IDBI and SeSTA, campus recruitment by Mahyco Seeds, career awareness and overseas-admission programmes, banking-sector alumni interaction, employability enhancement programmes and pre-placement engagement with PRADAN.

The Cell has therefore progressively adopted a **broader career-development approach**, extending beyond placement alone to include employability training, industry exposure, career counselling, higher-education opportunities and preparation for diverse career pathways.
